# Information Memo

To: Mayor and Council

From: Bill Cridland, GM, Operations

Date: November 29, 2021

Regarding: Hastings Drive Shoreline Protection

---

## Recommendation(s):

THAT the Information Memo regarding Hastings Drive Shoreline Protection private contribution be received as information.

## Background

In January 2021 Norfolk County received a \$20,000 financial contribution from a private resident to be utilized for providing additional shoreline protection along Hastings Drive.

## Discussion:

Ops staff obtained the appropriate permits and approvals to complete the work in the spring and the work was completed in September 2021. Norfolk County supplied the concrete rubble, at no cost, for the purposes of this shoreline protection, and the financial contribution was utilized to engage contracted services for trucking and the placement of the rubble.

Please note that Norfolk County was only permitted to install concrete rubble along County owned properties and could not complete any work on privately owned properties.

## Attachment(s):

N/A

## Conclusion:

The work was completed for under the \$ 20,000 contribution and Ops staff are in discussions with the resident to complete more work in the spring of 2022.

Please feel free to contact me with any questions or concerns you may have.
